WinXP / Office2007

Generate Reports:

- When running a report for the first time after system power-up, user may get Switch-To message.
- When running a report, the user must agree to macro-free workbooks.
- When running a report, the user must specify report as .XLS format.

Vista Home Basic / Office2007

Generate Reports:

- When running a report for the first time after system power-up, user may get Switch-To message.
- When running a report, the user must agree to macro-free workbooks.
- When running a report, the user must specify report as .XLS format.
- When saving a report file, a message appears stating that the file path is incorrect. However, if the user types in a filename, the file will save.

Vista / Office2003

Generate Reports:

- Functional, but message about incorrect file location during report save.

Edit Sequences:

- Text display issue.

EventSort:

- Opens, but doesn't create events as specified.
