

AgMobile™

Powerful Mobile Data Collection

Combining the benefits of handheld data collection software and RFID animal identification, AgInfoLink has developed AgMobile™, an effective mobile data collection solution for livestock producers.

BENEFITS

- Easy in-the-field data collection
- Access to animal history information
- Fast and accurate data collection
- Easy animal inventory
- Improve herd management

FEATURES

- Collects and displays individual animal data.
- Transfers collected data to BeefLink™.
- Stores information about your complete herd for fast lookup.
- Built in automatic data collection functionality.
- Collect up to 12 separate pieces of data in one RFID tag scan.
- Plays audio alerts for actions that need to be performed.
- Eliminate visual tag reading and use of clipboards.
- Runs on Windows Mobile 2003 and Mobile 5.
- ISO compatible, compliant with emerging National ID standards.
- Data can be collected with a built in keypad or data can be scanned in via bar code (optional bar code reader required).

AgMobile™ is a Windows Mobile compatible program that uses Bluetooth to communicate with wireless RFID tag readers. AgMobile™ allows livestock producers to quickly identify animals, record data, reference historical data, and make on the spot management decisions. The program **simplifies record keeping** and **reduces labor** making your operation **more profitable**.
