

BeefLink®

Powerful Data Collection & Reporting Solutions
Enabling Your Success

DATA COLLECTION

REGIMENS

Pre-set data collection fields for collecting all necessary compliance and/or value information. Regimens ensure that data is correctly applied to each record at the time of data collection.

WORK CARDS

RFID scan cards that can be customized to collect specific events by simply scanning each tag. They allow for efficient and accurate data collection at the speed of commerce.

SEQUENCING

Automatically sequence visual tags or bar code labels upon scanning new animal id tags.

AGINFOPORTS™

Allows for easy interfacing to most livestock scales, thermometers, GPS, bar code, and RFID readers.

REPORTING

AGINFOSHEETS

A Microsoft Excel-based reporting tool that allows for dynamic analytical reports where users can easily filter and sort for reporting and decision making.

REAL-TIME DECISIONS

Calculate Average Daily Gain (ADG) to determine animal performance and Weeks to Ship (WTS) to sort animals based on the target finishing weights for optimal management.

BENEFITS

AgInfoLink creates Real Solutions for Real Customers that translate into Real Benefits.

- Market cattle to the highest potential using historical data for program placement and specification documentation
- Efficient data collection and record keeping
- Reporting capabilities
- Compliance with National ID
- Faster processing time
- Effective management
- Ability to securely share data

DATA SHARING

SHARE DATA

This powerful tool allows users to share data to AgInfoLink's PonyExpress™ Data Connect Highway so that necessary information can be sent to state or federal animal health officials or marketing programs.
